

CALL FOR PAPERS

Workshop on Remote Operation of Intelligent Connected and Automated Road Vehicles

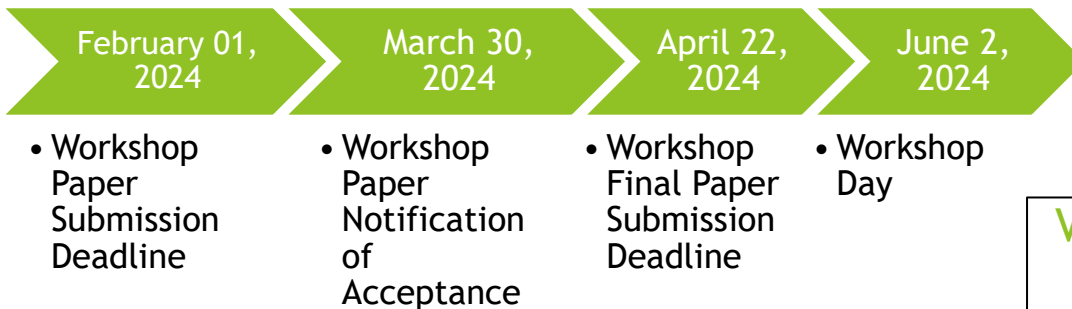

*in conjunction with 35th IEEE Intelligent Vehicles Symposium
June 2 - 5, 2024, Jeju Island, Korea*

Scope and topics

- **Remote operation** of road vehicles
- **Connectivity** challenges in road vehicle remote operation
- **Human factors** in road vehicle remote operation
- **Human-machine interface** for the remote operation of road vehicles
- **Standards, laws, and regulations** related to remote operation of road vehicles
- **Vehicle design and technology** to support remote operation of road vehicles
- **System architecture** for remote operation of road vehicles

**we also welcome other topics that are relevant to the field but not listed above.*

IMPORTANT DATES

PAPER SUBMISSION

Authors are invited to submit **full-length papers up to six (6) pages** (two-column each page) including figures and references. A maximum of two (2) supplementary pages is permitted at an extra charge of 100 USD per page. Each accepted paper must be covered by at least one non-student registration.

Papers submitted for the workshop will undergo the same review process as the conference papers and **will be published in the same proceedings.**
